

Cornell TPC event:  
single track  
through the blue pads

ArCO<sub>2</sub>(10%)  
cage: -20kV  
@ termination: -900V  
grid: -600V  
pads: -2000V  
anode: +550V

There are 7 instrumented pad rows on the readout board. The 32 pulse height spectra are offset in the display to correspond to the 7 pad rows; the color identifies the pad within the row.

2048 time buckets, 100MHz, 20.48  $\mu$ s
